

Stop!

Before any demolition or renovation of a non-residential* building

You are required to

Inspect for ASBESTOS

using an accredited inspector

Notify the Montana Department of Environmental Quality (DEQ)

Obtain a Permit for all demolitions** and for any renovation that impacts asbestos containing material

- You must have your project *inspected by a MT DEQ accredited asbestos inspector*.
- You must *notify the Montana Department of Environmental Quality* (DEQ) of all demolitions** of public or commercial buildings regardless of the presence of asbestos, and of any renovation of public or commercial buildings if the project will impact asbestos containing material as identified in the required inspection.
- Notification forms are available at asbestos.mt.gov or call the DEQ Asbestos Control Program at 406 444-5300 or email deqacponline@mt.gov. Forms must be received by DEQ two weeks prior to the start date of the project. See asbestos.mt.gov for complete asbestos regulations.

* Residential units (4-plex or smaller) are not regulated by the State of Montana. (OSHA regulations apply to residential work. Search "29CFR1926.1101" online for OSHA details.)

** Demolition is defined as "the removal of any load-bearing structural member, or intentional burning."

For more information on the asbestos inspection requirement, locating an accredited asbestos inspector, and other asbestos regulatory requirements, go to asbestos.mt.gov or call (406) 444-5300.
